DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1, 8-11, drawn to gp39-specific antibodies, compositions thereof, nucleic acids encoding said antibodies and vectors comprising said nucleic acids, classified in Class 424, subclass 130.1, Class 435, subclass 320.1, Class 530, subclass 387.1 and Class 536, subclass 23.53.

II. Claims 2-7, drawn to a methods of treating disorders with gp39-specific antibodies, classified in Class 424, subclass 130.1.

III. Claims 12-14, drawn to methods of suppressing immune responses during cell or gene therapy, classified in Class 424, subclass 130.1.

IV. Claims 15, drawn to methods of suppressing immune responses during transplantation, classified in Class 424, subclass 130.1.

2. Inventions I and II/III/IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)).

In the instant case, the product as claimed can be used in a materially different process such as affinity purification procedures or detection assays. Furthermore, there are a number of other agents that are patentably distinct from Group I, which are used to inhibit the immune responses encompassed by Groups II-IV.

3. Inventions II/III/IV are different methods of use, which require different ingredients, process steps and endpoints. Therefore, they are patentably distinct.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

A. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

B. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, MUST be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings MUST be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.185(a). Failure to take corrective action within the set (or extended) period will result in ABANDONMENT of the application.
